ONUKEI KENJI

(54) NETWORK COMMUNICATION SYSTEM, METHOD THEREFOR, NETWORK MANAGEMENT DEVICE, NETWORK TERMINAL EQUIPMENT AND INFORMATION STORAGE MEDIUM

(57)Abstract:

PROBLEM TO BE SOLVED: To relieve communication burdens of a network management device which collects management data from plural network terminals.

SOLUTION: One network management device 2 sends one piece of polling data to one 3A among plural network terminals 3A to 3E, and plural network terminals 3A to 3E add their own management data to the received polling data and send it to the network terminal 3B on the next stage. When management data of all the terminals 3A to 3E are added to one piece of polling data in this way, it is sent back to the device 2. Therefore, the device 2 collects all of management data of plural terminals 3A to 3E by sending and receiving only one piece of polling data.

LEGAL STATUS

[Date of request for examination] 07.05.1997

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
